

What are we supposed to do?

Challenge: Explore the creatures and features you find in our mini-ponds or plots!

1

Check out the **Pour-A-Pond/Sortin' Soil** pages in your **Event Guide**, then go to the **Explore Table**.

2

1. Look at one of the three **mini-ponds or plots** on the **Explore Table**. What kinds of things do you see? What are those things doing?
2. Now, using the **magnifying glass**, look closer at the objects in the mini-pond or plot. What do you see now?
3. Using your **Event Guide**, record your observations and classify the objects as **living** or **non-living**.

3

Once your observations are complete, look at the other mini-ponds or plots to see if you can find different creatures and features doing different things.
